You missed an interesting CAG mtg last nite. Nothing of immediate concern..., I can fill you in later. I forwarded Steve's e-mail to Sean S & someone here at DEQ.

Jim

Jim,

Great seeing you again last night. I hope the PHS is progressing well. I'm cc'ing Tim Parker, from NW Green Products. He has made contact with the Army Corps of Engineers and if there is an opportunity to use Biodiesel and biodegradable lube stocks in dredge hydraulic systems we'd like to learn more. You mentioned Shawn Sheldrake with EPA. Is he running the "Green Remediation" program you referenced? How can we provide information that might help?

Please let me know if there's more we can do. Thanks.
